

Storage recommendations for D12 Rope, made with Dyneema®

D12 rope, made with Dyneema®, will keep its original properties for approximately 10 years, provided the product is properly stored in accordance with the following conditions:

- Store the material in its original wrapping or box.
- Avoid exposure of the product to direct sunlight.
- Maintain ambient temperatures between 10 °C and 30 °C.
- Maintain a normal level of humidity 40-60% RH.
- Store in a fire proof location and avoid sparks and flame.
- Keep away from incompatible materials such as strong oxidizing materials.
- Do not stack pallets on product packed in wrapping.
- Maximum stacking height of product packed in boxes: 2 layers.

In all cases it is recommended to inspect and test the product prior to use to verify the properties for the intended use.
